Senior Software Engineer with 14+ years building web products, the last 5+ on a B2B strategy-execution SaaS used by large enterprises. Go-to engineer for integrations (Jira, Azure DevOps, Microsoft 365) and the OAuth, sync and reliability work behind them. I own features end to end, from spike and design doc to backend, frontend and production, with AI as a daily part of how I work.

EXPERIENCE

Senior Software Engineer · Workpath

Apr 2021 – Present

Munich, Germany · Remote

B2B SaaS for strategy execution (OKRs, KPIs, initiatives and business reviews) used by large enterprises, including DAX-listed companies. Go-to engineer for integrations and owner of epics end to end, across backend and frontend.

- Owned 8 epics end to end in six months (spike → design → tickets → backend → frontend → release) and reviewed 295 pull requests.
- Mentored junior engineers through daily code reviews and pairing.
- Ran the backend technical interviews (live coding and technical questions) and took part in frontend hiring.

Key projects

- **Azure DevOps integration:** Built it from scratch, then added Microsoft OAuth alongside access tokens with zero customer disruption, redesigned the extension (Microsoft Marketplace) and enabled linking from both sides.
- **Jira integration (Cloud and Data Center):** Built and maintained it across Cloud and Data Center, including the Java plugin; two-way linking to more goals and key results, on shared code that makes each new integration cheaper.
- **Key results from Excel and Power BI:** Built the Power BI integration and demo that helped win a large enterprise customer in a competitive evaluation; a reusable architecture with shared Microsoft sign-in made Excel much faster to ship. Also built the backend API for the Teams app and contributed to Planner.
- **Keeping the platform modern:** Led every upgrade from Rails 6 to Rails 8.0 and Ruby 4.0; the latest shipped with zero incidents and surfaced a hidden production bug. Dependencies kept current with Dependabot.
- **Platform and enterprise features:** SCIM provisioning (incl. Okta), SAML-based user management, role-based permissions, GraphQL APIs and a dedicated production region for an enterprise customer.
- **Reliability and observability:** Cut errors from hitting Jira's API limits by 37% and peak traffic by 73%, by retrying failed requests automatically and spreading them out over time. Also fixed security vulnerabilities.

AI-native engineering

- Delivered full epics without handovers: as a backend engineer, also shipped their frontend with Claude Code, including the Azure DevOps and Jira linking flows, with designs pulled in through the Figma MCP.
- Investigated production issues and measured the impact of changes using AI with the Grafana MCP server.
- Wrote the team's CLAUDE.md conventions and reusable skills, wired in MCP servers (Grafana, Figma, Atlassian) and turned lessons from production into AI coding guidelines.
- Built the APIs and search that Workpath's AI assistant uses to find and link work items.

Ruby on Rails · PostgreSQL · Sidekiq · Redis · GraphQL · RSpec · React · TypeScript · Java · Kubernetes · GitHub Actions · Grafana

Senior Backend Developer · Selectra

Jan 2018 – Mar 2021

Madrid, Spain

Energy and telecom comparison company. I built and owned the internal applications the call center used to find the right offer for each customer and close contracts.

- Built the telecom sales application from scratch, from coverage check to signed contract.
- Designed a real-time coverage-lookup module across partner providers, each with its own undocumented format.
- Built a drag-and-drop page builder that let the SEO team generate many landing-page variants.
- Set up CI/CD and managed the infrastructure on Google Cloud.

Lead Developer · DADA.NYC

Feb 2014 – Dec 2020

New York, USA · Remote

Social platform where artists and people speak through drawings, and collect digital art with crypto.

- One of the two backend engineers who built the platform; maintained its servers and CI/CD.
- Wrote the first Ethereum smart contract (Solidity), used for DADA's first collection sale, and built the marketplace on top of it.
- Built the entire backend of Pushem, a push-notification service launched as its own product and used by DADA.

Ruby on Rails · MarionetteJS · Node.js · Socket.IO · PostgreSQL · MongoDB · Redis · Elasticsearch · Ethereum · Solidity · Web3

Freelance Developer · PicketFencer

Jul 2017 – Jul 2020

New Jersey, USA · Remote

Home search service covering 600+ suburbs around New York City, helping people find houses and apartments in their next hometown.

Ruby on Rails · JavaScript · Bootstrap

Web Application Developer · Ries, Inc.

Jul 2012 – Jan 2014

Miami, USA · Remote

Software company behind two products: AlliHay, a deal-finding app, and Celuseguro, mobile phone insurance against theft.

- AlliHay: Rails backend for a community app where people shared the best deals in nearby stores.
- Celuseguro: Rails back office and the full CakePHP customer app, from device check to payment, financing and policy issuance.

Earlier

IT Analyst · Harvest Natural Resources — Jun 2011 – Jan 2014

Intern · FUNVISIS (Venezuelan Foundation for Seismological Research) — Aug – Oct 2011

Computer Consultant · Casa Arturo Uslar Pietri Foundation — Jan 2007 – Jul 2010

Computer Consultant · Municipal Council of Chacao — 2006 – 2010

SKILLS

Backend	Ruby on Rails · Ruby · PostgreSQL · Redis · Sidekiq · GraphQL · REST API design · Multi-tenancy · RSpec · TDD
Integrations & identity	Jira Cloud & Data Center · Azure DevOps · Microsoft Graph · Teams · Planner · Excel · Power BI · OAuth2 · JWT · SAML · SCIM · Webhooks · Rate limiting & retries
Frontend	React · TypeScript · React Query · Styled-Components · Azure DevOps extensions
Operations	Kubernetes (k9s) · GitHub Actions (CI/CD) · Grafana (Loki, Prometheus) · Sentry · New Relic · Incident response · Root-cause analysis · Data backfills
AI-native engineering	Claude Code · CLAUDE.md conventions · Reusable skills · MCP (Grafana, Figma, Atlassian)
Also	Java (Atlassian SDK) · Git & stacked PRs · Code review · Mentoring · Spikes & design docs
Languages	Spanish (native) · English (C1) · EU work authorization (Spanish citizen)

EDUCATION AND CERTIFICATES

Bachelor of Computer Science · Central University of Venezuela — 2016

Matter 7 cohort, with DADA.NYC · Matter Accelerator, New York City — Jun – Dec 2017

EuRuKo 2024, the European Ruby Conference · Sarajevo — 2024

Leadership: Technology and Engineering Management · Udemy — 2020

Scrum Master and Leading Agile Teams · Udemy — 2020

Ruby on Rails Web Development Specialization · Johns Hopkins University · Coursera — 2017

Angular 2 + Rails 5 Bootcamp · Udemy — 2017
